

NAFTALI MURIMI
NJERI

EDUCATION

Silesian university of Technology
2024 - Current

Faculty of Organization Management
Major: MSc Cognitive Technology

Area of focus

Artificial Intelligence & Machine Learning
Cognitive Systems & Human-AI Interaction
Data Analytics & Statistical Modeling
Generative AI & Intelligent Systems

Certification

Corporate Readiness Certification (Kyndryl Partner Program)
Microsoft Azure AZ-900 certification

Murang'a University of Technology
2018 – 2022

Bachelor of science Information Technology
❖ First class Honours

Kesap Research Centre
2020 – 2020

Data management and Data Analysis {SPSS & STATA} Certification

Itundu Secondary School
2014-2017

Kenya certificate of secondary education
❖ B- {minus}

PROFILE

Data Scientist and AI enthusiast pursuing a Master of Science in Cognitive Technologies. Backed by a strong foundation in Information Technology, I specialize in using Python, SQL, and data-centric approaches to solve complex analytical challenges. Experienced in managing operational data and building dynamic machine learning models. I excel in multicultural environments and am highly motivated to use data-driven methods to optimize system performance and support fast, strategic decision-making.

PROFESSIONAL EXPERIENCE

System Administrator & ICT Officer

Arise Technical Training Institute | Jun 2023 – Sep 2024

Designed and maintained data-driven web applications using Python (Django) and relational databases, supporting institutional operations and analytics needs.

Managed and analyzed real operational data, contributing to improved proactive maintenance, system reliability and decision-making processes.

Identified recurring technical failures and ensured a 95% same-day resolution rate, ensuring high system availability for staff, students and preventing the rate of occurrence for such incidents.

Developed and enforced IT policies aligned with industry best practices, ensuring compliance with data handling regulations under the Kenya Data Protection Act 2019 and enhancing operational efficiency within the institute.

Oversaw the collaboration with all stakeholders to translate technical insights into clear, actionable recommendations.

ICT Instructor & Program Coordinator

Nima College – Ngong Campus | Jun 2022 – Jun 2023

Taught Programming, Data Analysis, Web Development, and Introductory AI concepts to 200+ students, guiding them in building data-driven and AI-enabled applications, emphasizing analytical thinking and problem-solving.

Helped integrated AI and Generative AI tools into learning workflows to enhance productivity, understanding and designed practical projects and assessments that improved programming pass rates by 18%.

Freelance Software Developer & Data Analyst

Dec 2024 – Present

Built data-centric web applications integrating third-party APIs for real-time analytics and visualization.

Developed AI-assisted prototypes using LLM APIs, focusing on prompt engineering and system behavior analysis, performed exploratory data analysis and statistical modeling using Python, R and SQL to extract insights from large structured datasets.

Collaborated remotely with clients, delivering scalable, well-documented solutions.

SELECTED PROJECTS

AI-Powered Data Analysis Tools:

Been involved building Python-based analytics pipelines for preprocessing, modeling, and visualizing datasets to support decision-making such as:

Generative AI Prototypes: Designed prompt-driven GenAI applications using LLM APIs (ChatGPT, Gemini) to test system behavior, summarize data, and automate insights.

Django-Based Analytics Applications: Developed backend systems integrating databases, APIs, and analytics logic for real-time data processing
